

# ITCO

IRANIAN POWER DEVELOPMENT  
TURBINE COMPANY (PJS)

## **ITCO TARGET:**

ITCO with approach to his knowledge-basis essence and believing competitive in industrial arena; tries to collaborate with credible and reliable foreign companies in order to make an intelligent, competitive, profitable and innovative collection.

ITCO follows on executing below activities under cooperation with his foreign joint companies:

- Technical and marketing exchange information.
- Find mutual cooperation bases.
- Sign contracts in mutual investment and finance of industrial projects.
- Procurement and import projects equipment.
- Develop internal target markets.
- Export industrial commodities.

## ITCO INTRODUCTION:

ITCO (Iranian Turbine Company) started writing his history in 2011 and was founded on knowledge-basis Company which it has been approved by Presidency of the Islamic Republic of Iran Vice-Presidency for Science and Technology.

ITCO is owned by IDRO with 49% and PADICO with 51% shares.

**IDRO** being the main hand of power for the industry minister of Iran. IDRO concentrates on an overview of previous performance aiming to operationalize the development plans as well as to continue the trend of industrial investment within the framework of laws and regulations.

**PADICO** owns many aviation related companies and is considered one of the few private aircraft manufacturing organizations in Iran.

**ITCO** has some memorandum of understanding and agreement with famous, credible and reliable companies such as AeroTech (France), C.E.C Company (South Korea) and Chris Marin (Germany).

## ITCO ACTIVITIES:

### Aviation Industries:

- Design and development of parts and aviation assemblies.
- Design and manufacturing of aviation engines by new reverse engineering methods.
- Upgrading and improvement of aviation engines.
- Periodic and specialized maintenance of rotating machines.

### Oil, Gas and Petrochemical:

- Design and development of Oil and Gas parts, assemblies and sub assembling.
- Design and development of rotating equipment parts and systems in Oil and Gas industries such as gas turbines, compressors and pumps.
- Top overhaul of rotating equipment specially gas turbines up to 15 MW.
- Installation and commissioning all of Oil and Gas rotating equipment.
- Monitoring and troubleshooting of rotating equipment and compressors specially.

### Power Plant Industries:

- Design, manufacturing and commissioning of CHP small scale power plants (up to 25 MW).
- Consultation and feasibility study in power plants up to 25 MW.
- Designing and constructing CHP and CCHP up to 25 MW power plants.
- Commissioning and operation/ utilize up to 25 MW power plants.
- Repairing and troubleshooting of systems and small scale power plants generators.
- Energy consumption managing and energy saving.
- Energy supplying by mobile/portable power plants.

## ITCO CERTIFICATES:

- Quality certified issued by IRSQ (Iranian Society for Quality).

- Power Plant establishing permission from I.R.I Power Ministry.

- ISO 9001-2008 certified by AGR.

- Power plant establishing license from I.R.I Ministry of Industry, Mine and trade.

- Presence in Iran Oil & Gas Industries Approved Vendor List (AVL).
